

Stratum Dashboards 1.0.3

What's New?

Tips & Other Enhancements For User Interface

Screen enhancements like built-in tips and user prompts were added to guide new users through the quick process of setting up a Stratum Dashboard. Learn how to swiftly layout a new dashboard or edit an existing one. Additional, searchable online help is available through the main Help button. The Widget Settings window received a redesign. Info buttons give tips about key window properties. Additional changes to the window allow for faster customizations of what features show in view dashboard items.

Note: Dashboard functionality is available as of version 7.1.1 of Stratum.Viewer. Viewer-authorized users can set up and share dashboards. Contact Silvon Support at CustomerSupport@silvon.com for more information.
